

Primary Internal Dashboard

In partnership with Dartmoor Teaching School Alliance, has commissioned Mark Beeston (Performance Data Specialist) to develop an Excel spreadsheet into which you can load in-year assessment data to produce an Internal Dashboard that replicates the most recent official Inspection Dashboard.

Features

Data interrogation

Pupil-level data fields used in the performance indicator calculations are available to sort or filter. e.g. Quickly find KS2 disadvantaged pupils who are not making expected progress in maths.

Modelling

As all calculations update instantly you can easily see the effect on performance indicators of different outcomes. e.g. How will the reading progress score change if a particular group of pupils achieve higher than expected progress?

Instructions

Place an order and provide your latest RAISE Summary Report – you will then receive the spreadsheet populated with your historic data.

Populate datasheets for KS2, KS1 and EY with pupil level assessment data – either import from another MIS, enter manually or a bit of both.

Individual pages of dashboard can then be viewed in spreadsheet or the complete dashboard can be exported to pdf at the click of a button.

Endorsement:

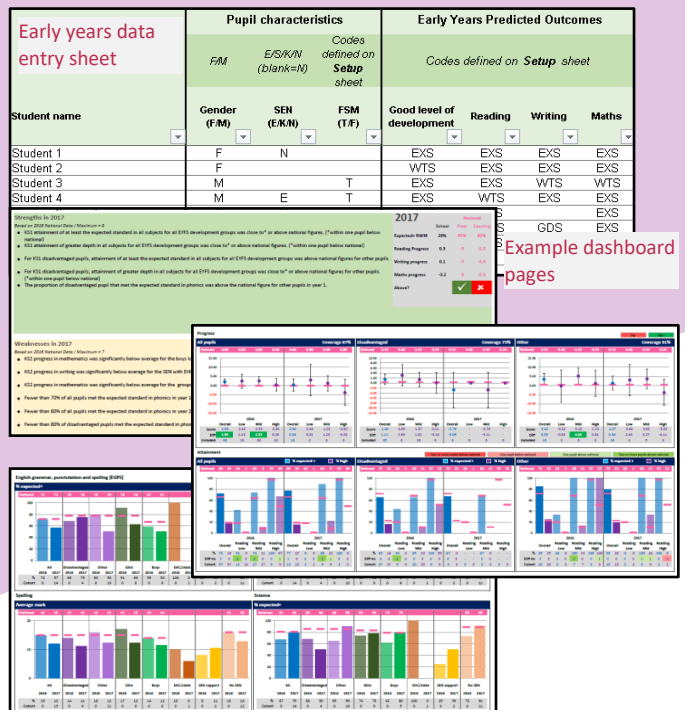

“Do you want to be able to predict what your inspection dashboard is going to look like in the autumn term? Use your in-year predictions with this amazing new system to generate an internal dashboard. Present to your governing body and SLT the headlines in a consistent format to identify the key improvement priorities. Enabling you to keep the main thing, the main thing!”

Jon Lunn (Performance Director – Ted Wragg MAT)
